3	Page 4 of 4 SCC-Clause No. 29	29. Special Condition for Super structure in Dressed Stone masonry The stone to be used for super structure shall be the stone in matching with the monument e.g. type, color & texture. Each stone shall be cut to the required size and shape, so as to be free from waviness and to give truly vertical and horizontal joints. In exposed masonry, with the faces that are to remain exposed in the final position and adjoining faces to a depth of 6mm. shall be the fine chisel dressed so that when checked with 60cm straight edge, no point varies from it by more than 10mm. The top and bottom faces that are to form the bed joints shall be chisel dressed so that variation from 60cm straight edge at no point exceeds 3mm. Faces which are to form the vertical joint should be chisel dressed so that variation at any point with 60cm straight edge does not exceed 6mm. Any vertical face that is to come against backing of masonry shall be dressed such that variation from straight edge does not exceed 10mm. All angles and edges that are to remain exposed in the final position shall be true, square and free from chippings. The one exposed face shall be rough tooled / punched. A sample of dressed stone shall be prepared for approval of Engineer in charge. It shall be kept at the work site as a sample after being approved before execution. The CPWD specification 91-92 description under point 7.4 shall be adhered to by the contractor for construction of stone masonry.
